## Energy Market Update May 6, 2008

### Opportunity for a Fixed Steam “Fuel Adjustment” Cost this Summer

Con Edison has just announced an offer to obtain a fixed price for a portion of your steam fuel cost for the coming summer period. The Negotiated Steam Fuel Cost Program (NSFCP) will run from June 2008 through August 2008 and would allow you to secure a fixed price for the fuel component of the steam cost up to 60 percent of your load. The remainder would be subject to the monthly fuel adjustment as posted by Con Ed. This program will help to reduce the volatility in fuel cost. The fixed fuel price may be higher or lower than the actual monthly market price.

The window of opportunity for participating in this program is brief and quickly approaching. The open enrollment period is from now until May 14. If you are interested, you must sign and submit a Customer Base Agreement to Con Ed Steam by May 15, 2008. This agreement sets the maximum amount of steam that would be eligible for the program. On Tuesday, May 20, 2008, Con Edison will notify you of the specific fixed-price offer. You would then accept or reject this fixed price offer by noon Wednesday, May 21, 2008.

MCEnergy (MCE) can assist you in taking advantage of this potential opportunity by serving as your liaison to Con Edison and analyzing the costs and risks associated with a fixed price. To get started, either complete the form below and fax it to (914) 767-3730, or reply to this email, filling in the needed information. This will authorize us to request a Customer Base Agreement from Con Ed on your behalf.

**Enrollment begins now; therefore, please respond no later than May 9, 2008 by providing your account number(s) and returning your executed authorization below.**

Thank you for taking the time to consider this important offer from Con Edison. In the meantime, if you would like further information please do not hesitate to contact me or Thomas Morrisson at (914) 767-3100.

- Meg
